

Pergola Shade - Measuring Guide

Step 1: Measuring the width

Record the overall width of the awning. This is the width including the mounting brackets.

Please record in millimeters. Measuring form on page 2.

The mounting brackets are 100mm deep.

Step 2: Measure the extension

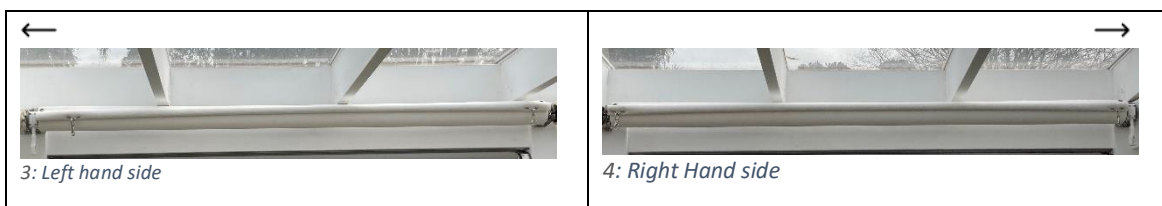

This is the length the awning will extend out to when in place.

The awning is supplied with extra cloth to cover the roller when extended.

Step 3: Gearbox Side

Record the side you require the removable crank handle to be.

Remember this is recorded as looking back at the awning.

Sales@dropscreensdirect.co.nz

Step 4: Gearbox colour

Record Gearbox and handle colour:

Black / White

Step 5: Fabric colour

Charcoal / Sand / Silver / White

-Click the icon to request a colour sample sent out.

Step 6: Reduce waste

Help us reduce waste by recording the material you will be fixing into. E.g. Aluminium, Wood, Steel, Concrete, Then we can make sure we only send you the fittings you require.
